

Site Consolidation

Geometric’s site consolidation offering focuses on providing customers with a well-defined process for rationalizing sites in multi-site federation. We enable consolidation of databases to help reduce hardware, software licenses and resource costs.

Traditionally organizations set up multiple data centers to manage globally located teams involved in product development process. With the increasing size of data, management and retrieval of data becomes expensive and effort-consuming.

Geometric enables organizations to leverage Teamcenter’s FMS technologies ensuring better file management services and consolidation of data from different data centers to a single center, or to a fewer number of centers. Our custom built tools complement the execution methodology and enable a faster data transfer process.

Key Challenges	Geometric Solution Approach	Key Benefits
<ul style="list-style-type: none"> • Data distribution within the organization • Dispersed geographical locations, network bandwidth and latency • Data grouping, access and privileges • Data security and compliance 	<ul style="list-style-type: none"> • Analyze current data usage across the deployments • Data analysis – consolidate shared and unshared data • Data treatment <ul style="list-style-type: none"> • Redistribute shared data • Load unshared data into the consolidated site • Maintain data integrity in the consolidated site 	<ul style="list-style-type: none"> • End-to-end site consolidation process starting from the definition of the site consolidation process, and implementation of the plan, to post-implementation support • Custom-built assets, and templates to ensure high rate of success • Reduced time: minimal time to consolidate data • Reduced maintenance and TCO

Drivers for Site Consolidation

Cost: Hardware, software licenses, network and maintenance costs

Time : Time spent for data sharing, synchronizing and real-time data sharing

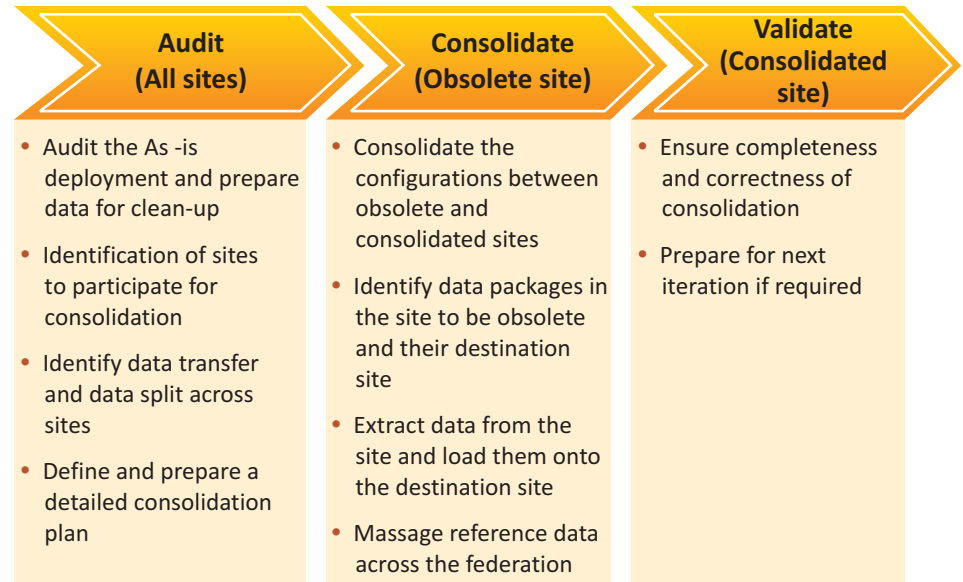

Quality : Minimize error during data sharing process

Innovation: mproved and reliable technologies

The Geometric Advantage

Methodology:

Our well-defined methodology to execute the site consolidation process, supported by our customized tools helps customers minimize consolidation time while maintaining data integrity and quality.

Tools:

To ensure process accuracy, data integrity and productivity, Geometric has built tools and assets for site consolidation process, including:

- Configuration manager tools: To compare the data models across sites and import any configurations required to achieve consolidation of sites
- Data manager tools: To extract, transform and load data into the database
- Validation tools: Set of scripts and reports to ensure data integrity

About Geometric

Geometric is a specialist in the domain of engineering solutions, services and technologies. Its portfolio of Global Engineering services and Digital Technology solutions for Product Lifecycle Management (PLM) enables companies to formulate, implement, and execute global engineering and manufacturing strategies aimed at achieving greater efficiencies in the product realization lifecycle.

Headquartered in Mumbai, India, Geometric was incorporated in 1994 and is listed on the Bombay and National Stock Exchanges. The company recorded consolidated revenues of Rupees 5.98 billion (US Dollars 129.47 million) for the year ended March 2009. It employs close to 3000 people across 10 global delivery locations in the US, France, Romania, India, and China. Geometric is assessed at SEI CMMI Level 5 for its software services and ISO 9001:2000 certified for engineering operations. For further details, please visit www.geometricglobal.com.
